Normal Working Hours (VN Time)

Monday to Friday 08:00hrs – 17:00hrs Saturday 08:00hrs – 12:00hrs

Who We are

We can assist you in providing:

- Design & Planning
- Project Specific Solutions
- Procurement
- Traffic Planning for the flow of goods and people
- Project Budgeting
- Drawings & Scheduling
- On Site Supervision
- Installation & Servicing

What We Offer to Our Partners

Our commitment to excellence makes Astech Corp. a trusted and solid partner for:

DESIGNERS AND ARCHITECTS, who can rely on the advice of our experts in order to find the best solutions for the needs of their customers;

DISTRIBUTORS, who are trained for the installation and the subsequent maintenance of our automatic doors; they can rely on our continuous support in order to establish a fruitful relationship;

CONTRACTORS, who can rely on punctual supplies that meet the requirements of their building projects.

Sales Team

Our sales team has many years of industry experience and will work with you to ensure the best possible outcome for your project.

They are equipped with the latest estimating software which allows us to provide you with the best and most economical insulated panel solution whether it is for a supply only materials project or a large supply and construct project. Make the ASTECH sales team your first contact.

Drawing Team

Using the latest in AutoCAD technology our drafting team can supply our clients with detailed construction and as built drawings, whether it is a commercial cold room or a major cold storage facility. They work in conjunction with our production and on site management team to ensure that your project is on track and stays that way.

Construction Team

Our on site construction teams are all industry experienced and can provide you with a no fuss well managed, safe and on time project completion. Try us and see for yourself

Maintenance & Servicing

Our maintenance and service team can provide scheduled routine maintenance and servicing for all your insulated panel buildings, doors or products. This maintenance and servicing can be scheduled to work around your busy day to day business eliminating any down time to you

Our doors range

INDUSTRIAL DOORS

- Distribution centers
- Warehouse and garages
- Dock areas
- Loading out/in areas
- Auto showroom
- Industrail factory
- car parking

Doors

- Overhead section doors
- Glass Folding doors
- Thermal roller shutter doors
- Fire-resistant doors
- Folding doors
- High speed doors
- Dockleveller
- Dockshelter

FOOD CARE

- Dairy processing
- Meat & Fisheries processing
- Food Processing units
- Coldstorage
- Pack houses
- Infant Nutrition & Dried Milk proces

Doors

- Overhead section doors
- Thermal roller shutter doors
- Chiller sliding doors
- Freezer sliding doors
- High speed doors
- Traffic swing doors

HEALTHCARE & PHARMA

- Operating Theatre
- X-ray
- ICU doors
- Hospital Laboratories

Doors

- Medicare Glass
- Metaflex Medicare

RETAIL & LOGISTIC

- Distribution center
- Supermarket
- Food preparation
- warehouse & Stock room

Doors

- Autoglass doors
- Dock levellers
- Dockshelters

Pecializes in airtight door systems and advanced automation for the medical sector, the health care sector, the food sector and for cleanrooms and laboratories.

Our doors are the right choice for diverse applications.

Track of Hermetically seal sliding doors

Patented with special indentation, angled at 45 degrees, allowing the door to fall down and in, creating a better than **99%** airtight

Industrial doors

Industrial doors or hall doors are used in large storage facilities, industrial facilities or in factories - anywhere where you need to close up large openings. Industrial sectional doors or roller shutters are often used for the outside areas of halls. It is important for industrial doors to have a long service life, as they are often part of the production or logistics processes; interrupting either of these processes can be very expensive. Teckentrup industrial doors are convincing due to their extreme robustness and the reliability of their functions.

Projects Completed

- ☐ Volkswagen
- ☐ Mercedes
- ☐ Renault
- ☐ BMW
- ☐ Audi
- ☐ Opel
- ☐ Various airports in Germany and Europe
- ☐ Supermarket chains
- ☐ Logistic centres
- ☐ Stadiums
- ☐ Hospitals
- ☐ Theaters
- ☐ Cinemas
- ☐ Embassies
- ☐ Volkswagen India
- ☐ Airport Luxembourg
- ☐ Mercedes Windhoek
- ☐ Aspen Pharmacare Port Elizabeth
- ☐ QK Meat Johannesburg
- ☐ Mercedes East London - Manufacturing plant of the New C-Class
- ☐ Audi show room - Springs Jhb
- ☐ Porsche new show room - Jhb
- ☐ New Foschini Distribution plant in Jhb
- ☐ South Pole Manufacturing plant from Unilever - Jhb
- ☐ Knorr Bremse - Manufacturing plant of train braking systems – Jhb
- ☐ Robert Bosch – Vietnam

SECTIONAL DOORS

INSULATED ROLLING SHUTTER:

FAST ROLLING SHUTTER

Multifuntinal Doors & Fire Doors

The door leaf, consisting of overlapping sections, opens upwards underneath the hall ceiling and is a space-saving solution even for reduced headroom situations. Clever safety features meet all the requirements of workplace regulations. Teckentrup fire-resistant sectional doors are suitable for every type of hall. The door guide mechanism is adapted to local conditions to facilitate crane operation or if work inside the hall should not be interrupted by door movements.

Building authority approval

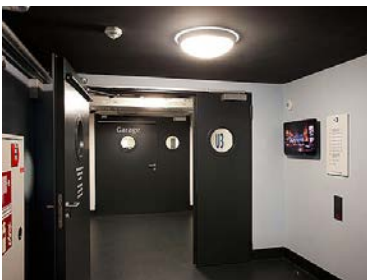

Fire-resistant sectional door T30 "Teckentrup S" - approval no. Z-6.20-2195
tested in accordance with EN 1634-1 (DIN 4102)

Approved dimensions

Width: 1000 - 5000 mm, Height: 2000 - 3630 mm

**Fire-resistant sectional door
T30 "Teckentrup S"**

FIRE-PROOF DOORS

Depending on the risk of fire and the thermal load, Teckentrup fire protection doors have got all the requirements covered. The wide range covers the resistance classes Fire-resistant (T30), Highly flame resistant (T60), Fire-proof (T90).

SECURITY DOORS

Teckentrup security doors protect both people and property. From the cellar security door to prison cell doors, the burglar resistant doors conform to all resistance classes up to WK 4.

INTERNAL DOORS

In buildings there are always doors that have to be able to cope with particular strains but that also need to match the interior design. Here, Teckentrup provides internal doors that are robust and that harmonically blend into the environment.

❑ The folding doors are used more and more frequently as industrial closing systems and the technological level achieved in the production of panels and bearing structure makes the manufacture of doors bigger and bigger possible, offering new solutions for important fields like: shipyards and airports.

Besides the insertion of portholes, particular windows and ventilation grilles, our folding doors can be equipped with pedestrian doors used for frequent passages, sparing to open the main door if it is not necessary. Moreover, they can be manual, motorized or only predisposed for motorization; in the second case the movement is controlled with various automatisms and security systems, on demand: "dead man" control, remote control, push-button panel, photocells. In case of folding doors of big dimensions it is necessary to install a ground track and to motorize them.

FOLDING DOORS

GLASS FOLDING DOORS

❑ Kopron High speed doors has been planned to be opened and closed hundreds of times throughout the whole day and for a long time.

High-speed doors are a new concept of doors produced with material of good quality and with an exclusive design. They can be used for frequent passages of vehicles, for dividing departments and for defining parking areas always guaranteeing functionality and safety for all the operators.

HIGH SPEED DOORS

Turn-Key Supply Projects, involving Commercial and Industrial Refrigeration Equipment. We carry a full line of Pre-Fabricated Insulated Panel Systems, as well as, a full line of Cold Storage Doors and Commercial Refrigeration equipment.

In addition, Dock equipment

- ✓ Overhead section doors
- ✓ Hydraulic dockleveller
- ✓ Docksheter
